

Data Mining

CSIS-4330

S2 2021 Section W5 3 Credits 03/15/2021 to 05/07/2021 Modified 03/04/2021

Description

Many businesses are discovering that stored within their corporate data repositories are the elements to understanding and controlling the components of their business processes. Data mining is the process of finding useful patterns in data. The objective of data mining is to use discovered patterns to help explain current behavior or to predict future outcomes. This course will provide a foundation to understand data mining methods and data visualization techniques by examining how these technologies provide useful knowledge that supports critical business decisions. This course will introduce data mining techniques and have the student experiment with data mining applications. Additionally, the course will explain how data visualization can allow managers to quickly access large data repositories and make clear decisions based on integrated information structures.
